378 21A16

# Proceedings of the Indian Academy of Sciences

QD 1 P76

Vol. 89, January–December 1980

## CONTENTS (Chemical Sciences)

INORGANIC AND ANALYTICAL

4-Nitro 2-picoline-1-oxide complexes of lanthanide perchlorates
*N S Navaneetham and S Soundararajan* 17–23

CNDO and INDO MO calculations of a few properties of rubredoxins
*S Vijaya, P K Mehrotra and P T Manoharan* 25–41

Preparation, characterisation and thermal properties of hydrazinium derivatives. Part III
*K C Patil, J P Vittal and C C Patel* 87–93

Spectrophotometric determination of iron(III) with N-hydroxy-N-phenyl-N′ (2-methyl) phenylbenzamidine hydrochloride in presence of thiocyanate and azide
*Hemlata Mohabey, Pramod Kumar Sharma and Rajendra K Mishra* 95–99

Complexes of osmium with tertiary arsines and carbon monoxide
*K G Srinivasamurthy, N M Nanje Gowda, E G Leelamani and G K N Reddy* 101–108

A theoretical study of the Jorgensen's nephelauxetic effect in some simple transition metal halo-complexes from a molecular orbital computation
*S Vijaya and P T Manoharan* 109–118

Complexes of lanthanide nitrates with 2-N-(6-picolyl)-benzamide
*N Rajasekar and S Soundararajan* 263–267

Extraction of uranium(IV) and uranium(VI) by primary and tertiary amines from sulphate solutions
*R Shanker, B Venkataramani and K S Venkateswarlu* 269–275

Hydrothermal phase equilibria in $Ln_2O_3$–$H_2O$ systems
*J A K Tareen and T R N Kutty* 277–282

Synergism in the extraction of cerium using nitrogen base donors
*A K More and M Sudersanan* 375–379

Electrode kinetics of $Eu^{3+}/Eu^{2+}$ reaction by cyclic voltammetry
*T P Radhakrishnan and A K Sundaram* 381–385

Synthesis and physicochemical studies on Ni(II) complex of 2-hydroxy-acetophenonethiosemicarbazone and its square-planar adducts with nitrogen donors

*M S Patil and J R Shah* 387–390

Selective extraction of iron(III) with N-hydroxy-N-*p*-chlorophenyl-N'-*o*-chlorophenylbenzamidine hydrochloride as a thiocyanato mixed complex from hydrochloric acid media

*R S Kharsan, K S Patel, R K Mishra and L R Malewar* 411–415

Spectral and magnetic studies of complexes of Cu(II), Co(II), Mn(II) and Zn(II) with 2-hydroxy-1-naphthaldoxime

*R Seshadri Naidu, A Ramesh and R Raghava Naidu* 417–423

A polarographic study of indium complexes with sulphoxine

*M Ramaiah, B G Bhat and R Sundaresan* 425–429

Extraction of indium, cadmium and thallium by salts of dinonyl-naphthalene sulphonic acid

*M Sudersanan and A K Sundaram* 431–434

An example of an iron(III) porphyrin with spin mixed ground state

*S Mitra, S K Date, S V Nipankar, R Birdy and Jean Jacques Girerd* 511–517

Ternary complexes in the spectrophotometric determination of trace amounts of silver(I) and cadmium(II)

*K A Idriss, M M Seleim and M S Abu-bakr* 519–523

ORGANIC

Synthesis of 1-isopropyl-8,9-benzospiro [5,5] undecane-7-ol and its catalytic dehydrogenation

*Ashutosh Mitra and Sunil Baran Das* 1–6

Aspects of tautomerism-9-solvolysis of normal and pseudo phthaloyl chlorides

*M Vivekananda Bhatt, Shaker H El Ashry and Viswanatha Somayaji* 7–15

Thermal behaviour of resorcinol-1,2-dichloroethane resin

*Jitu Patel, Rajni Patel and K C Patel* 119–123

Mechanism of formation of Cu(II) carboxylates in the solid state: Kinetics of reactions between benzoic acid, salicylic acid and $CuCO_3 \cdot Cu(OH)_2$

*P S Bassi, B R Gupta and I B Sharma* 125–130

Synthesis of phenyldithioglyoxalic acid and its esters. A route to *α*-ketodithioacid derivatives

*Jayalakshmi Ramachandran, D V Ramana, S R Ramadas and C N Pillai* 283–288

Syntheses of 2,4,6-tris (di-tetrahydrofurfuroxy) phosphinyl-*s*-triazine and its derivatives as fire-retardants for cellulose

*Bhoop Singh Sharawat, (Mrs) Indra Handa and Hari L Bhatnagar* 289–294

Synthesis of new $\triangle^4$-thiazolines. Part I
*S T Ingle, S M Kapley and M S Chande* 295–299

Reaction of $\beta$-naphthyl cinnamate with aluminum chloride
*T Manimaran, T Jayachandran and V T Ramakrishnan* 301–307

Polarographic behaviour of 2,4-dinitrodiphenylamine in amphiprotic media
*V John Koshy, C S Venkatachalam and C Kalidas* 391–395

Preparation of unsaturated sulphones through new aryl sulphonylacetic acids
*D Bhaskar Reddy, R Krishna Murthy and N Subba Reddy* 397–403

Condensation of *o*-benzoquinone with 4-hydroxy coumarins: A new synthesis of 3-aryl-4-hydroxy coumarins and coumestans
*K Srihari and V Sundaramurthy* 405–410

Vilsmeier reaction on some 6- and 7-methoxy-1- and 2-tetralones
*P Anantha Reddy and G S Krishna Rao* 435–439

Reactions of substituted thioflavones and 2-methyl-thiochromone with thionyl and sulphuryl chlorides
*J R Merchant and G Martyres* 441–447

Isocoumarins: Part 4. Synthesis of 5,6-dimethoxy, 6,7-dimethoxy, 7,8-dimethoxy, 5,7-dimethoxy, 5,8-dimethoxy-3-methylisocoumarins and a new synthesis of (±)-6-methoxy mellein
*Bhaskar H Bhide and Dinker I Brahmbhatt* 525–532

PHYSICAL AND THEORETICAL

Microwave absorption and molecular structure of some substituted acetic acids in dilute solutions of dioxane
*S B L Misra, S K S Somevanshi and N K Mehrotra* 43–48

$^{35}Cl$ Zeeman quadrupole spectra in $CoHgCl_4.4H_2O$
*V Ramakrishna, G Satyanandam, B V R R K Murty and C R K Murty* 49–55

Size determinations of crystallites and hydrophilic/hydrophobic domains in polycrystalline lamellar soaps by x-ray diffraction
*M K Nagarajan* 57–63

Oscillations in the bromate system with malic acid as the substrate
*R Ramaswamy, S Jaya and N Ganapathisubramanian* 65–68

Role of adsorption on the growth of barium and lead tartrate crystals in silica gels
*M Abdulkhadar and M A Ittyachan* 69–75

Structure activity studies on the phenolic substrates in microsomal hydroxylation
*Harkishan Singh, Vijay Gombar and D V S Jain* 77–86

The role of $V^{4+}$ ions in vanadium oxide catalysts I. Decomposition of 2-propanol
*D K Chakrabarty, M Rajyalakshmi and A B Biswas* 131–137

Surface tension measurements in the study of molecular complexes
*Ram Adhar Singh, S P Mishra and S N Bhat* 139–144

X-ray photoelectron spectra and Auger studies of the surface oxidation of cobalt
*M S Hegde, A Srinivasan, K Jagannathan and G C Chaturvedi* 145–151

Conductance studies on the interaction of D-glucose with alkali halides in water and formamide
*Vishnu and Vidya Sagar Mishra* 153–161

Vibrational and electronic absorption spectra of 4-chloro-2-methyl-4-chloro-3-methyl and 6-chloro 3-methyl phenols
*R B Singh and D K Rai* 163–173

Nonrigid molecular behaviour of beryllium borohydride I. INDO study
*Carl Trindle and Sambhu N Datta* 175–181

CNDO bonding parameters in transition metal atoms
*Sankar Prasad Bhattacharyya* 183–192

Molar volumes of ammonium chloride–ammonium salt solutions
*R L Blokhra, S K Agarwal and S S Thakur* 193–200

Vibrational spectra and thermodynamic functions of allyl acetate
*Bhadur Singh, R Prasad and R M P Jaiswal* 201–207

Effect of adsorption of vapours on the electrical conductivity of some polyene semiconductors : adsorption and desorption kinetics
*Alpana Ghosh, Biswanatha Mallik and T N Misra* 209–217

Rotational isomerism in $\omega$-bromoacetophenones
*B Subrahmanyam, G Venkateshwerlu, D D Patnaik and (Mrs) E Padmavathi Reddy* 219–223

Prediction of vibrational spectra from microwave spectra
*T A Mathai and V Balasubramanian* 225–230

Normal co-ordinate analysis of $CH_2F_2$ and $CD_2F_2$ kinetic constants and optimisation technique
*P Sivakumar, C Subramanian, B Krishna Rao and P Ramasamy* 231–234

Limit cycle behaviour in the Belousov–Zhabotinskii oscillatory reaction
*N Ganapathisubramanian, R Ramaswamy and J C Kuriacose* 235–239

Sorption properties of oxides VI. Silver ion impregnated mixed oxides
*B Venkataramani and K S Venkateswarlu* 241–245

Electrical conductivity and chemical reactivity of hydrous ferric oxides
*R F Menezes, V N Kamat Dalal and H V Keer* 247–252

Study of geometrical parameters in N–H···N type of hydrogen bonds
*Nageshwar Prasad and Girjesh Govil* 253–262

Order from chaos with molecular beams
*John B Fenn* 309–331

Electrodeposition of hafnium from the aqueous bath
*Arvind T Rane* 333–336

Transference number of charge-transfer complexes in solutions methanol-iodine and ethanol-iodine
*S N Bhat and Rajeev Dwivedi* 337–340

A simple calorimeter for the heats of mixing study of associated liquids : Enthalpy of hydrogen bonded ethanol-butylamine complex
*Shirish D Pradhan and Gopal Pathak* 341–347

Enthalpy of hydrogen bonded alcohol-butyl amine complexes by a simpler calorimetric method
*Shirish D Pradhan and Gopal Pathak* 349–354

NQR investigations in crystalline 2,5-dichloroacetanilide
*K K Vijaya Kumar, D V Ramanamurti, P Venkatacharyulu and D Premaswarup* 355–359

Thermal decomposition of zinc hydroxy azide
*S R Yoganarasimhan and C R Jagga* 361–368

Thermal decomposition of $\gamma$-irradiated zinc hydroxy azide
*S R Yoganarasimhan and C R Jagga* 369–373

Infrared spectroscopic study of the rotation of the $NH_4^+$ ion in ammonium halides
*Somnath Ganguly* 449–454

Excess thermodynamic properties of isomeric butanols with *n*-heptane at 55° C
*Anil Kumar, Gopal Pathak and S S Katti* 455–462

Electronic absorption spectroscopic studies on the red form of methylene blue ion
*A S N Murthy and A P Bhardwaj* 463–468

Green's function application to normal vibration of dichlorosilane ($SiH_2Cl_2$) molecule
*R Namasivayam and S Viswanathan* 469–476

Photo-decomposition of zinc hydroxy azide
*S R Yoganarasimhan and C R Jagga* 477–487

Dependence of metal Auger intensity ratios on the effective charge on metal atoms
*S Yashonath and M S Hegde* 489–494

On the evaluation of one-centre matrix elements of a modified Coulomb interaction operator
*K V Sane and R P Saxena* 495–501

Dielectric studies of solute-solvent interactions in mono-alcohol systems
*K Sabesan, R Varadarajan and M Sargurumoorthy* 503–509

Thermogravimetric and Mössbauer investigation of the reduction of $\alpha$-$Fe_2O_3$ and $Li_{0.5}Fe_{2.5}O_4$
*N Ramachandran and D K Chakrabarty* 533–538

Photocycloaddition of coumarin and carbostyril to olefins—An inter-molecular orbital study
*Rita Chadha and N K Ray* 539–547

Change of molecular structure in the excited states : A (CNDO/2) hole-potential study on phosphine
*Manas Banerjee and Sanker Prasad Bhattacharyya* 549–559

Thermal stability of *p*-xylene-formaldehyde resin and its derivatives
*Rajni Patel, K C Patel, B N Mankad and R D Patel* 561–568

Adsorption and interaction of oxamyl with kaolinites
*O P Bansal, Mahesh Prasad and S N Srivastava* 569–577
